NATIONAL NUMBERING PLAN

INDEX

LIST OF ABBREVIATIONS

1	ACC	Account Card Calling
2	AN	Andaman & Nicobar
3	AP	Andhra Pradesh
4	AS	Assam
5	BR	Bihar
6	BSNL	Bharat Sanchar Nigam Limited
7	BSO	Basic Service Operator
8	BY	Mumbai
9	CAC	Carrier Access Code
10	CC	Country Code
11	CIC	Carrier Identity Code
12	CMTS	Cellular Mobile Telephone Service
13	DEL	Direct Exchange Line
14	DOT	Department of Telecommunications
15	DSPT	Digital Satellite Phone Terminal
16	FPH	Free Phone
17	GJ	Gujrat
18	GMPCS	Global Mobile Personal Communication Service
19	HA	Haryana
20	HP	Himachal Pradesh
21	HVNET	High-speed VSAT Network
22	ICIC	International Carrier Identification Codes
23	ILD	International Long Distance
24	ILDO	International Long Distance Operator
25	IN	Intelligent Network
26	INET	Data Network of BSNL
27	INMARSAT	International Maritime Satellite
28	ISDN	Integrated Services Digital Network
29	ISP	Internet Service Provider
30	ITU	International Telecommunication Union
31	JK	Jammu and Kashmir
32	KL	Kerala
33	KT	Karnataka
34	LDCA	Long Distance Charging Area
35	LDCC	Long Distance Charging Centre
36	MH	Maharashtra
37	MNC	Mobile Network Code
38	MP	Madhya Pradesh
39	MSC	Mobile Switching Centre
40	MSS	Mobile Satellite Service
41	MTNL	Mahanagar Telephone Nigam Limited
42	ND	New Delhi
43	NE	North East
44	N(S)N	National (Significant) Number
45	NDC	National Destination Code

46	NLD	National Long Distance
47	NLDO	National Long Distance Operator
48	NPA	Number Plan Area
49	OR	Orissa
50	PB	Punjab
51	PLMN	Public Land Mobile Network
52	PRM	Premium Rate
53	PSTN	Public Switched Telephone Network
54	RJ	Rajasthan
55	SDCA	Short Distance Charging Area
56	SDCC	Short Distance Charging Centre
57	SN	Subscriber Number
58	SP	Signalling Point
59	STD	Subscriber Trunk Dialling
60	TAX	Trunk Automatic Exchange
61	TC	Trunk Code
62	TN	Tamilnadu
63	UMS	Unified Messaging Service
64	UN	Universal Number
65	UPE	Uttar Pradesh (East)
66	UPT	Universal Personal Telecommunication
67	UPW	Uttar Pradesh (West)
68	VCC	Virtual Card Calling
69	VMS	Voice Mail Service
70	VoIP	Voice over Internet Protocol
71	VPN	Virtual Private Network
72	VSAT	Very Small Aperture Terminal
73	WB	West Bengal

NATIONAL NUMBERING PLAN (2003)

1.   INTRODUCTION

1.1   The National Numbering Plan was last reviewed during 1993. The plan covered basic as well as other services like cellular mobile, paging etc. Though the 1993 Numbering Plan could cater to the needs of existing and new services for another few years, yet it was felt to rationalise and review the existing National Numbering Plan because of introduction of a large number of new telecom services and opening up of the entire telecom sector for private participation. The existing Numbering Plan was formulated at a time when there was no competition in the basic telecom services and the competition in cellular mobile services had just started, paging services were in a stage of infancy and Internet services were not available in the country.

1.2   The telecom services were mainly being provided by either the Central Government or its public sector undertakings. There was hardly any need for coordination of numbering schemes.

1.3 The last few years have seen tremendous growth all around and particularly in the field of cellular mobile services. In some of the countries, these services have already exceeded the traditional basic services. In India too, the cellular mobile services have seen a growth of almost 100% during the last one year. Further, the existing Numbering Plan was meant to address monopolistic environment in national and international long distance dialling. The Government of India has since introduced unlimited competition in basic, National Long Distance (NLD) and International Long Distance (ILD) Services and licensed four service providers in respect of cellular mobile services in most of the licensed service areas. As such, it was felt to review the existing Numbering Plan and to formulate a plan, which will be futuristic, flexible and could cater to the numbering needs for about next 30 years in respect of the existing and likely new services. Keeping this in view, the new Numbering Plan has been formulated for a projected forecast of 50%   tele-density by the year 2030 and thus making numbering space available for 75 crore telephone connections in the country comprising of 30 crore basic & 45 crore cellular mobile connections.

1.4 The new National Numbering Plan will be able to meet the challenges of multi-operator, multi-service environment and will be flexible enough to allow for scalability for next 30 years without any change in its basic structure.

1.5   The other main objectives of the plan are –

    i)   To plan in conformity with relevant and applicable ITU standards to the extent possible.
    ii)   To meet the challenges of the changing telecom environment.
    iii)   To reserve numbering capacity to meet the undefined future needs.
    iv)   To support effective competition by fair access to numbering resources.
    v)   To meet subscriber needs for a meaningful and user-friendly scheme.

vi) To standardise number length wherever practical.

vii) To keep the changes in the existing scheme to the minimum.

1.6 Only the decimal character set 0-9 has been used for all number allocations. Letters and other non-decimal characters shall not form part of the National (Significant) Number [N(S)N].

1.7 Dialling procedure as per ITU Recommendation E.164 has been followed.

1.8 The Short Distance Charging Area (SDCA) based linked numbering scheme with 10-digit N(S)N has been followed. This would expand the existing numbering capacity to ten times.

1.9 Some of the salient features of the National Numbering Plan are as follows:

- It is a SDCA based linked numbering scheme.
- N(S)N is 10-digit for both the basic as well as cellular mobile services.
- The Subscriber Number (SN) for basic services will be of 6, 7 or 8 digits depending upon the length of SDCA code.
- Basic to cellular mobile service calls shall use prefix '0' only if Point of Interconnect (POI) is not available in the same Long Distance Charging Area (LDCA) from where the call is originated.
- Basic services shall be accessed by cellular mobile using '0'.
- There is no change in the cellular mobile numbering structure.
- Levels 0, 1, 7, 8 and 9 shall not be used as first digit for telephone exchange codes in basic services.
- There is no change in the numbering structure for paging services.
- Carrier Access Code (CAC) for NLD and ILD has been defined as '10'.
- Separate Carrier Identification Codes (CIC) have been earmarked for toll and non-toll quality NLD and ILD services.
- All the service providers shall use '100', '101' and '102' for Police, Fire and Ambulance services respectively.
- '107X' has been defined for emergency information services like earthquake, floods, air and train accident etc.
- Intelligent Network service access codes on '16XX' are shifted to '18XX'.
- Trunk services codes are shifted from '18X' to '150X'.
- Certain level '1' codes are earmarked for all service providers to offer various subscriber related services, as per their choice, within their network.
- Voice Mail Service (VMS) access code is shifted from '93' to '170'.
- Enough spare levels/ codes are reserved for future needs.

2. NATIONAL NUMBERING SCHEME

2.1   **Level '0':**

2.1.1   **Sub level '000':**

The prefix '000' shall be used for home country direct service (Bilateral) and international toll free service (Bilateral). The format used is: '000 + Country Code + Operator Code' except '000800' which is used for bilateral international toll free service.

2.1.2   **Sub level '0010' - INTERNATIONAL CARRIER ACCESS (Prefix) CODE:**

The prefix '0010' shall be used for selection of international carrier. It will be followed by International Carrier Identification Code (ICIC), Country Code (CC) and N(S)N. The format shall be as under:

Prefix	International Carrier Identification Code	Country Code	National(Significant)Number
0010	ICIC	CC	N(S)N

Initially ICIC shall be a two-digit code. This will be sufficient for allotment to 50 international long distance service providers considering that maximum of two codes may be allotted to each service provider depending upon toll quality and non-toll quality network. However, to take care of all possible future requirements, length of ICIC may be reviewed and changed to 3-digit code as and when required. The allotment of ICIC may start from '10' and codes '00' to '09' may be kept reserved.

2.1.3   **Sub level '00' - INTERNATIONAL PREFIX:**

The prefix '00' shall be used for International dialling. It will be followed by country code and the N(S)N of the country to which that call is attempted. The format is as per ITU Recommendation E.164:

Prefix	Country Code	National(Significant)Number
00	CC	N(S)N

2.1.4   **Sub level '010' - NATIONAL CARRIER ACCESS (Prefix) CODE:**

The prefix '010' shall be used for selection of national long distance carrier. It will be followed by (National) Carrier Identification Code (CIC) and N(S)N. The format shall be as under:

Prefix	Carrier Identification Code	National(Significant)Number
010	CIC	N(S)N

Initially CIC shall be a two-digit code. This will be sufficient for allotment to 40 NLDOs (including NLDOs licensed for basic services) and 10 BSOs licensed only for basic services, considering that maximum of two codes may be allotted to each service provider depending upon toll quality and non-toll quality network. However to take care of all possible future

requirements, length of CIC may be reviewed and changed to 3-digit code in future. The allotment of CIC may start from '10' and codes '00' to '09' may be kept reserved.

For intra circle long distance service, the carrier access code shall be the same as applicable for NLD service. The CIC from '10' to '79' shall be allotted to NLD service providers. For the NLD service providers, who are also Basic Service Operators (BSOs), same CIC shall be applicable for intra circle (service area) calls.

CIC from '80' to '99' shall be allocated to the BSOs who are not licensed to provide NLD service.

2.1.5   Sub level '0' - NATIONAL PREFIX:

The prefix '0' shall be used for national long distance calls (cellular mobile as well as basic services), intra service area (Circle) long distance calls of basic services, cellular mobile to basic services calls and calls from basic services to cellular mobile (depending upon point of interconnect). The format shall be as under:

For basic services (PSTN) long distance calls:

Prefix	National Destination Code	Subscriber Number
0	2/ 3/ 4-digit trunk (SDCA) code	8/ 7/ 6-digit

For basic services to cellular mobile calls if Point of Interconnect is not available in the same LDCA from where the call is originated:

Prefix	PLMN Access Code	MSC Code	Subscriber Number
0	2-digit e.g. 98, 94 etc.	3-digit	5-digit

For cellular mobile to cellular mobile calls outside the service area from where the call is originated:

Prefix	PLMN Access Code	MSC Code	Subscriber Number
0	2-digit e.g. 98, 94 etc	3-digit	5-digit

For cellular mobile to basic services calls:

Prefix	National Destination Code	Subscriber Number
0	2/ 3/ 4-digit trunk (SDCA) code	8/ 7/ 6-digit

2.1.6   Sub level '011' to '089' - GEOGRAPHICAL NUMBER RANGE:

These codes are also called trunk codes and identify a specified geographical area where a call is to be terminated. The national telecom network in India has been divided as under:

- SDCA: Short Distance Charging Area also called local area
- LDCA: Long Distance Charging Area comprising of one or several SDCAs

ITU Recommendation E.164 provides four options for National Destination Code (NDC) structure. India has adopted type-2 structure for PSTN where NDC is the trunk (Area) code assigned to each SDCA. Each SDCA is allotted a unique trunk code. There are at present 2645 SDCAs distributed in 322 LDCAs.

Accordingly, 2645 codes are required to identify the complete country based on SDCA linked numbering scheme. The length of the Trunk Code (TC) shall vary from 2 to 4 digits depending upon the size and telephone density requirement of the SDCA. Details regarding SDCA linked numbering scheme for PSTN, SDCA trunk codes (geographical) and the spare 2/ 3/ 4-digit codes are given at Annex-I, II and III respectively.

2.1.7 Sub level '09' - SERVICE (PREFIX) CODES:

The level range '09' is to be used for cellular mobile services, satellite based services and Intelligent Network (IN) services like premium rate & universal number (long distance). INET Service, which is presently working on '099' code, shall be relocated under level '1' services as '171'.

2.2 Level '1' SPECIAL SERVICES:

Level '1' is used for accessing special services like emergency services, supplementary services, inquiry and operator-assisted services. Some sub levels have been allocated for use by access providers (operators). These levels can be used for providing the services within their network. The detailed allocation of level '1' number range is given at Annex-IV.

2.3 Level '2' to '6' - PSTN NUMBER:

The numbers starting from '2' to '6' are reserved for PSTN within SDCA. At present the PSTN numbers in SDCAs vary between 5 to 7 digits so that the total N(S)N is 9-digit, except in a few cases where it is already 10-digit. It has been observed that the total telephone number requirement in some SDCAs with 5 digits numbers would be more than 50,000 in next 25 to 30 years. Similarly, in many SDCAs with 6 digits local number length, projected demand is likely to go beyond 5,00,000. Therefore, the subscriber number in SDCAs is increased by one digit so that the N(S)N is uniform and of 10-digit length.

While changing from 9-digit N(S)N to 10-digit N(S)N in SDCA, guidelines given at Annex-I shall be followed.

2.4 Level '7' & '8':

At present, level '7' & '8' are not being allocated and the same are reserved for new services.

2.5   **Level '9' SERVICES:**

The range of numbers in level '9' except '90', '95' and '96' are reserved for cellular mobile services. These will be allocated in 2-digit format.

2.5.1   **Paging Services**

At present, the following format used for paging services shall continue.

96	Operator Code	Service Code (auto/manual paging)	Pager Number

2.5.2   **Access to adjacent Area**

'95' shall be used for accessing adjacent areas in the following format:

95	SDCA Code	Subscriber Number

TABLE OF NATIONAL NUMBERING SCHEME

Number / Prefix	Sub level	Services	Structure	Remarks
0	000	Home Country Direct Service (International Service)	'000+CC+Operator Code' Except CC='800'	International called party pays
	000800	International Toll Free Service (Bilateral)	'000800+CC+Toll Free Number'	International called party pays
	0010	International Carrier Selection Code	Max. 21-digit number '0010+ ICIC+ CC+NDC+SN' where ICIC will be between '10' to '99' ICIC '30' & '31' already allotted for M/s Reliance Communications Limited. ICIC '50' & '51' already allotted for M/s Bharti Telesonic Limited. ICIC '60' & '61' already allotted for M/s Data Access (India) Limited.	ICIC code to be allocated from '10' to '99'. ICIC='00' to '09' reserved. Maximum of two codes may be allotted to each service provider depending upon toll quality and non-toll quality network.
	00	International Service	Max. 17-digit number '00 +CC+NDC+SN'	As per ITU Rec. E.164
	010	National Long Distance Carrier selection	15-digit number ' 010+CIC+N(S)N where CIC is between '10' to '99'. CIC= '10' to '79' for NLDOs & NLDOs licensed for basic services. CIC= '80' to '99' for BSOs licensed only for basic services. CIC '20' already allotted for BSNL CIC '30' already allotted for M/s Reliance Communications Limited CIC '40' already allotted for VSNL CIC '50' already allotted for M/s Bharti Telesonic Limited.	CIC='00' to '09' reserved. Provision may be kept for allotment of a maximum of two codes to each service provider depending upon toll quality and non-toll quality service.

Number / Prefix		Services	Structure	Remarks
	Sub level			
0	0	National Long Distance Service	11-digit number '0+NDC+SN' NDC+SN is also called as N(S)N	As per ITU Rec. E.164
	11XX to 89XX range	National Destination Code	NDC=2 to 4-digit Also known as SDCA Code	Allocation as per Annex-II
	0900	IN Service - Premium Rate	'0900+XXX + IN Number' where 'XXX' is SCP code from '000' to '999'	'xxx' to be allocated to intelligent network provider
	0901	IN Service - Universal Number (Long Distance)	'0901+XXX + IN Number' where 'XXX' is SCP code from '000' to '999'	'xxx' to be allocated to intelligent network provider
	0902	UPT Service	Not allocated[1]	
	0903 to 0909	Reserved for IN Services	Not allocated[1]	
	091 to 093	Reserved for PLMN	Not allocated[1]	
	094	For dialling PLMN	11-digit number '0+94+MSC Code+SN' MSC Code='000' to '999', SN=5 digits	Allocation as per Annex-VIII.
	0950	Reserved for Mobile Satellite Services	'0950+XX+SN' 'XX'= service provider	To be Allocated 'XX'='00' to '99'
	0951	Reserved for Mobile Satellite Service	Not allocated[1]	
	0952	HVNET	'0952+X+SN' X is service provider	To be Allocated 'X'='0' to '9'
	0953	INMARSAT Mini-M	'0953+X+SN' 'X' is service provider	To be Allocated 'X'='0' to '9'
	0954	Digital Satellite Phone Terminal	'0954+X+SN' 'X' is service provider	To be Allocated 'X'='0' to '9'
	0955 to 0959	Reserved	Not allocated[1]	
	096	Spare	Not allocated[2]	
	097	Reserved for PLMN	Not allocated[1]	
	098	For dialling PLMN	11-digit Number '0+98+MSC code+ SN MSC code ='000' to '999' SN= 5 digits	Allocation as per Annex-VIII

Number / Prefix	Sub level	Services	Structure	Remarks
1		Special Services	3 to N digits depending on service.	Refer Annex-IV
2 to 6		PSTN Subscriber Number	SN= 6 to 8 digits	Refer Annex-I
7 & 8		Reserved for future services	Not allocated[1]	
9		Services		
	90	Spare	Not allocated[2]	
	91 to 93	Reserved for PLMN	Not allocated[1]	
	94	For dialling PLMN	10-digit Number '94+MSC code+ SN' MSC code ='000' to '999' SN= 5 digits	Allocation as per Annex-VIII
	95	Access to adjacent SDCA area	'95+SDCA code+ SN'	
	96	Paging Service	10-digit '96+XY+ Pager Number' 'XY' is service provider code where 'XY'= '00' to '99'	'XY'= '00' to '99' to be allocated. Accessible from Outside Service area. Allocation as per Annex-VII
	97	Reserved for PLMN	Not allocated[1]	
	98	For dialling PLMN	10-digit Number '98+MSC code+ SN' MSC code ='000' to '999' SN= 5 digits	Allocation as per Annex-VIII
	99	Reserved for PLMN	Not allocated[1]	

Note:

1.   **Reserved, Not allocated:**
    These are the numbers to be allocated in consultation with the DOT for similar services under which they are categorised.

2.   **Spare and Not allocated**:
    These are the numbers for which services have not been defined and should not be allocated.

LINKED NUMBERING SCHEME FOR PSTN

1.1   **INTRODUCTION**

1.1.1   Indian Telecom Network is divided into number of LDCAs. Each LDCA consists of one or more SDCAs, which are also known as local areas. Each SDCA has one or more number of exchanges.

1.1.2   Each LDCA has a Long Distance Charging Centre (LDCC), which is a Trunk Automatic Exchange (TAX).

1.1.3   Each SDCA has a Short Distance Charging Centre (SDCC). Normally each SDCC is an integrated local-cum-tandem or a transit switch. In certain cases SDCC itself may also be LDCC.

1.1.4   Each SDCA normally covers one or more taluka or other administrative areas. The size of SDCA generally varies between 800 sq. kms to 2000 sq. kms.

1.1.5   As per the National Fundamental Plan 1993, the N(S)N is of 9 digits including 2 to 4-digit National Destination Code (SDCA Code) and 7 to 5-digit subscriber number. This excludes the access code '0'.

1.1.6   Most of the SDCA's have 4-digit trunk code, leaving 5 digits for subscriber number. With 5-digit length, only about 50,000 subscriber numbers per SDCA can be provided. If the subscriber base increases beyond 50,000 in an SDCA, either the number length will have to be increased or another trunk code will have to be allotted. Further, there are more than 700 SDCAs (with 4-digit code), which have more than 10,000 subscribers and are expected to grow more than 50,000 in next 30 years. These would need 6 digits local numbers. This would increase the total number length to 10 digits or else SDCA code will be required to be reduced to 3 to keep N(S)N of 9 digits. Since only about 150 spare 3-digit codes are available, only alternative is to increase the number length. The scheme envisages the use of SDCA based linked numbering with 10-digit N(S)N.

1.1.7   With the migration to uniform 10 digits SDCA linked numbering scheme, N(S)N would have following variants:

SDCA code	Subscriber Number
2-digit	8-digit
3-digit	7-digit
4-digit	6-digit

1.1.8 Some of the SDCAs with 3-digit trunk code and 7-digit subscriber number, will need to be changed to 2-digit SDCA code with 8-digit subscriber number. Similarly, N(S)N with 4-digit SDCA code with 6-digit subscriber number will need to be changed to 3-digit SDCA code with 7-digit subscriber number.

1.1.9 It is expected that the spare codes (Annex-III) of 2 or 3-digit length are sufficient and can be allotted in place of 3 or 4-digit code as and when the numbering capacity of these SDCAs is exhausted. New codes for SDCAs would ensure that N(S)N is of 10-digit length.

1.1.10 Numbering Plan Area (NPA)

Numbers in an NPA are not duplicated and are called 'subscriber numbers'. To make a call from one subscriber to another subscriber in the same NPA, only the subscriber number needs to be dialled. NPA relates to specific geographic or administrative area as far as possible. At present the NPA is same as SDCA.

1.2   **THE SCHEME**

1.2.1 SDCAs will continue to have separate trunk codes (known as SDCA codes).

1.2.2 The subscriber number in SDCA shall be 6, 7 or 8-digit, so as to keep N(S)N to 10-digit.

1.2.3 The access providers shall be allotted numbers in blocks of 10,000 for SDCAs with 4-digit SDCA code. For SDCAs with 2 and 3-digit code, exchange code allotted would be of 3 and 2-digit respectively so that a block of 1,00,000 numbers are available. It would ensure efficient use of number space.

1.2.4 The numbers allotted for an SDCA may be used in one or more telephone exchanges. Additional numbers will be allotted only after 80% of the capacity is utilised.

1.2.5 The access to adjoining areas can be on level '95' followed by N(S)N. However, all the SDCAs have to be necessarily accessible by dialling N(S)N with '0' prefix.

1.2.6 Certain level '1' codes are earmarked for use by access providers for various customer related services they may like to offer. Such codes are given at Annex-IV.

1.3   **NUMBERING FORMAT**

The PSTN Numbering format shall be as per the table 1:

TABLE 1

Trunk Code (SDCA code)	+	Telephone Exchange Code	+	Last n digits of Subscriber Number
ABCD	+	EF	+	PQRS
ABCD	+	EFG	+	PQR
ABC	+	EF	+	PQRST
ABC	+	EFG	+	PQRS
AB	+	EFG	+	PQRST
AB	+	EFGH	+	PQRS

- Digit A can have any value from 1 to 8 .
- Digit B, C and D can have any value between 0 to 9.
- Digit E can have any value between 2 to 6. [0, 1, 7, 8, 9 are NOT allowed, since level '0' is used as trunk prefix, level '1' is used for special services, levels '7' & '8' are kept spare for future services and level '9' is used for cellular mobile services, paging services & access to adjacent areas.]
- Digit F, G and H can have any value from 0 to 9.
- Digit P, Q, R, S and T can have any value from 0 to 9.

1.4   CAPACITY OF TRUNK CODES (SDCA CODES)

1.4.1 AB codes can have any value between 11 to 89 i.e. total 79 trunk codes. By sacrificing one AB code, ten ABC codes are obtained. The code '10' is earmarked for carrier access code for NLD service and ILD service.

1.4.2 At present 2-digit trunk codes being used are 11, 20, 22, 33, 40, 44, 79 and 80   (8 codes). When subscriber base in an SDCA expands beyond 4 crore, changeover from 10-digit N(S)N to 11-digit may be required. However, this scenario is not envisaged almost for another 30 years. Spare 2-digit trunk codes 39, 50, 60, 69 and 70 (5 codes) are available for allotment to SDCAs with 3-digit code depending on the requirement.

1.4.3 EFG codes can take any value between 200 and 699 i.e. total 500 exchange codes and these codes are considered sufficient for next 30 years.

1.4.4 Assuming an occupancy of 80% for each exchange code, the working Direct Exchange Lines (DELs) (in case of 7 digits subscriber number) with EFG codes may be upto 40 lakhs (500*10000*0.80). Therefore, an SDCA with 3-digit trunk code can go upto 40 Lakhs DELs. Similarly SDCA with 4-digit SDCA code can go upto 4 lakhs DELs.

1.5   DIALLING

1.5.1 Dialling within SDCA

For a call within a local area i.e. SDCA, subscriber number only will need to be dialled. The number of dialled digits will thus be 6, 7 or 8.

1.5.2 Dialling outside SDCA

For calls outside the SDCA, '0+N(S)N' as per ITU E.164 or '0+10+CIC+N(S)N' need to be dialled. However, access to adjacent areas can also be on level '95' followed by N(S)N. All such adjacent areas shall have to be accessible by dialling N(S)N with '0' prefix or through carrier selection procedure.

1.6 GENERAL GUIDELINES

1.6.1 The allocation of SDCA codes in the SDCA based linked numbering scheme shall be as per Annex-II.

1.6.2 Spare codes, which are not allocated to any SDCA at present, are listed at Annex-III.

1.6.3 Two digits spare codes are reserved for allocation to those SDCAs in which numbering requirements may become more than 40 Lakhs in the long run.

1.6.4 Certain three digit spare codes like 555, 666 and 888 are not to be used as SDCA codes. These are reserved for future services as indicated in Annex-III.

1.6.5 10-digit N(S)N is considered sufficient for more than 30 years.

1.6.6 Suitable announcements may be given to indicate changes in subscriber number while changing to 10-digit N(S)N.

1.7 GUIDELINES FOR DIFFERENT CASES OF NUMBERING STRUCTURE

The table 2 shows different subscriber number structure existing in the network and proposed when migrating to 10-digit N(S)N .

Table 2

CASE	EXISTING NUMBERING STRUCTURE (TC + SN)	PROPOSED NUMBERING STRUCTURE (TC + SN)	REFER PARA
1.	(4+5)	(4+6)	1.7.2
2.	(3+6)	(3+7)	1.7.3
3.	(2+7)	(2+8)	1.7.4
4.	(4+6)	(4+6)	1.7.5
5.	(3+7)	(3+7)	1.7.5

1.7.1 General requirements for migration

1.7.1.1 First digit of the telephone exchange codes can have any value between '2' to '6'. Presently '2', '3' and '5' are being used. '4' and '6' have been reserved for future use.

1.7.1.2 Digit '2' has been allocated as the first digit for BSNL/ MTNL numbers.

1.7.1.3 For the private BSOs, digit '3' or '5' is to be used as first digit.

1.7.1.4 First digit in subscriber number should not be '0', '1', '7', '8' and '9'.

1.7.2　　　　　　　**Migration to 10-digit N(S)N from 9- digit (4+5) N(S)N:**

All 5-digit subscriber numbers shall migrate to 6-digit numbers to make 10-digit N(S)N by adding first digit as '2' for BSNL numbers and '3' or '5' for private BSO numbers.

1.7.3　　　　　　　**Migration to 10-digit N(S)N from 9-digit (3+6) N(S)N :**

All 6-digit subscriber numbers shall migrate to 7-digit numbers to make 10-digit N(S)N by adding first digit as '2' for BSNL numbers and '3' or '5' for private BSO numbers.

1.7.4　　　　　　　**Migration to 10 digit N(S)N from 9-digit (2+7) N(S)N:**

All 7-digit subscriber numbers shall migrate to 8-digit numbers to make 10-digit N(S)N by adding first digit as '2' for BSNL/MTNL numbers and '3' or '5' for private BSO numbers.

1.7.5　　**Change of numbering scheme for SDCAs already at 10-digit N(S)N.**

The first digit of the subscriber number shall be as per Para 1.7.1 above.

NUMBERS FOR SPECIAL SERVICES

Number/ Prefix		Type of Services	Structure	Accessibility /Remarks	Category
(10)		**EMERGENCY SERVICES**			
100		POLICE	3-digit number	Restricted	I
101		FIRE	3-digit number	Restricted	I
102		AMBULANCE	3-digit number	Restricted	I
103		SPARE		Not Allocated[1]	
104		SPARE		Not Allocated[1]	
105		Hospital Related Services	4 to 6-digit numbers (105X)		
	1050	Heart Related.	4-digit number	Restricted	II
	1051	AIDS Related	4-digit number	Restricted	II
	1052	Blood Bank	4-digit number	Restricted	II
	1053	Eye Bank	4-digit number	Restricted	II
	1054	Poison Control Service	4-digit number	Restricted	II
	1055	Organ Retrieval	4-digit number	Restricted	II
	1056	Emergency Medical Services (Toll free in local area)	4-digit number	Unrestricted	I
	1057 to 1058	Reserved	4-digit numbers	To be allocated[2]	II
	1059	For specialized Hospitals	6-digit numbers	Restricted	II
106		SPARE		Not allocated[1]	
107		Emergency Information services	4-digit numbers		

Number/ Prefix		Type of Services	Structure	Accessibility /Remarks	Category
	1070	Relief Commissioner for Natural Calamities	4-digit number	Unrestricted	I
	1071	Air Accident Information	4-digit number	Unrestricted	I
	1072	Train Accident Information	4-digit number	Unrestricted	I
	1073	Road Accident Information	4-digit number	Unrestricted	I
	1074	Information on Pollution	4-digit number	Restricted	II
	1075 to 1076	Reserved	4-digit numbers	To be allocated[2]	I
	1077	Control Room of District Collector	4-digit number	Restricted	II
	1078 to 1079	Reserved	4-digit numbers	To be allocated[2]	I
108		Emergency 7 Disaster Management Services (Toll free in local area)	3-digit numbers	Unrestricted	I
109		Police Related Services	4-digit numbers (109X)		
	1090	Call alert (Crime Branch)	4-digit number	Restricted	II
	1091	Women crisis response Centre	4-digit number	Restricted	II
	1092X	Women Help Line Centre (Toll Free)	5-digit number	Restricted	II
	1093to 1097	Reserved	4-digit numbers	To be allocated[2]	**II**
	1098	Children in difficult situation	4-digit number	Restricted	II
	1099	Central accident and Trauma services (CATS)	4-digit number	Restricted	II
(11)		**ACCESS PROVIDER SERVICES**			
1100		Parishkaram	4-digit number	Restricted	**II**
111-115		SPARE		Not allocated[1]	
		Supplementary Control Services			
116		Wakeup call Registration	3-digit number		II
117		Wakeup call Cancellation	3-digit number	Restricted	II
118		Call waiting Registration	3-digit number	Restricted	II
119		Call Wailing Cancellation	3-digit number	Restricted	II

Number/ Prefix		Type of Services	Structure	Accessibility /Remarks	Category
(12)					
120 to 121		Supplementary Control Services. Reserved for access Providers	4-digit numbers	Restricted	III
122		Supplementary Control Services.			
	1220	Call Forwarding Busy Registration	4-digit number	Restricted	II
	1221	Call Forwarding Busy Cancellation	4-digit number	Restricted	II
	1222	Call Forwarding No Reply Registration	4-digit number	Restricted	II
	1223	Call Forwarding No Reply Cancellation	4-digit number	Restricted	II
	1224	Call Forwarding Unconditional Registration	4-digit number	Restricted	II
	1225	Call Forwarding Unconditional Cancellation	4-digit number	Restricted	II
	1226 to 1229	Reserved for Access Providers	4-digit numbers	Restricted	III
123		Dynamic STD Password Setting	3-digit number	Restricted	II

198		Local complaints	3-digit number	Restricted	II
199		Local Assistance	3-digit number	Restricted	II

Notes:

1. **Spare and Not allocated:** These are the numbers for which services have not been defined and should not be allocated.

2. **Reserved, To be allocated:** These are the numbers to be allocated by the body for management of National Numbering Plan as per the guidelines.

3. **Reserved, Not allocated**: These are the numbers to be allocated in consultation with the DOT for similar services under which they are categorised.

a. **Restricted:** These are the services to be accessible at least within local area.

b. **Unrestricted:** These are the services, which shall be accessible from anywhere, national or international.

c. **Category-I:** These are the mandatory services to be provided by all the Access Providers.

d. **Category-II:** These services are not mandatory, but Access Providers shall use only these codes if such services are provided.

e. **Category-III:** These are the codes to be used by the Access Providers to provide the services under which these codes are listed. These services shall be provided in their own network.

f. **Category-IV:** These are the codes to be used by the Access Providers to provide any service of their choice in their own network.

* Toll free for subscibers' payment to be made by Ministry of Medical, Health & Family Welfare, A.P.

LIST OF CODES ALLOTTED TO
VOICE MAIL SERVICE PROVIDERS

1. Access code of Voice Mail Service is shifted from existing '93X' to '170XY'. Existing single digit allotment of 'X' in '93X' may suitably be changed to 'XY' in '170XY'.

2. This code should be unique to a Service Provider in a SDCA.

3. Voice Mail Services are accessible from outside SDCA.

4. UMS and Audiotex Service Providers should also be allotted 'XY' code in the level '170'.

I. **LIST OF EXISTING LICENCEES FOR VMS/ AUDIOTEX/ UMS SERVICE**

CODES ALLOTTED TO PAGING SERVICES

1.   **INTRODUCTION**

- The access code for paging services shall remain '96'.
- Paging services should be accessible from outside SDCA.
- The format shall be:

ACCESS CODE	OPERATOR CODE	PAGER NUMBER
96	XY	6-digit Pager Number

XY= '00' to '99'

- Two codes, one for 'auto paging' and second for 'operator assisted paging' shall be allocated to each operator.

I.   LIST OF THE COMPANIES WITH ACCESS CODES FOR PAGING SERVICES

Sl. No.	Name of the Company	Access Codes		Vernacular	
		Auto Paging	Operator Assisted Paging	AP	OAP
1.	M/s Page Point Services (India) Pvt. Ltd.	9623	9624	-	9604

.

NUMBERING FOR CELLULAR MOBILE NETWORK

ALLOTMENT OF MOBILE SWITCHING CENTRE (MSC), SIGNALLING POINT (SP) AND MOBILE NETWORK CODES (MNC) FOR CELLULAR OPERATORS

1. The cellular mobile network has been divided into 19 service areas and 4 metropolitan cities for which licenses were issued. Accordingly Numbering Plan was formulated for allotment of MSC code for each operator with spare codes for future allotment.

    The format of cellular mobile service Numbering Plan is given below:

ACCESS CODE	MOBILE SWITCHING CENTRE (MSC) CODE	SUBSCRIBER NUMBER
2-digit	3-digit	5-digit
98/94 etc.	ABC	XXXXX

- Presently level '98'/'94' have been allocated as access code for mobile networks.
- ABC='000' to '999'. However, ABC='000' to '099' have not been allocated and are reserved.
- XXXXX= 00000 to 99999.

Initially in each service area/metro, two operators were given licence to operate. With further opening up of mobile services, two more operators are permitted to operate in each service area/metro areas.

The Signalling Point (SP) codes for mobile operators are given in 9000/10000 series. The MSC codes and SP codes allotted to the cellular mobile operators in different circles/metros are also listed in Table-1.

TABLE 1

MSC CODES ALREADY ALLOCATED TO CELLULAR MOBILE OPERATORS

5/9	500 to 999	10500 to 10999

Guidelines for allotment of MSC codes

- MSC codes shall be allotted to the service providers from the series from which they are already issued the MSC codes.
- Additional MSC codes shall be allotted only when the subscriber base of 60% has been achieved with the allotted codes.
- When all the codes are exhausted from the same series, MSC codes from other series, which are not used or expected to be less used, may be allocated.
